

Proven in a decade of excellence

What some of our global customer base says:

„The product range of Mangold offers an enormous performance range and is extremely helpful to our research.

We adore the professional service and support Mangold offers in any situation.“

Dr. Holodynski, Institute of Psychology,
University of Bielefeld

„INTERACT was selected after a survey of several available systems. The use of INTERACT was found to be effective and time saving and appears to offer a significant advantage to the analyst and hence the efficiency of the research process.“

Zafer Bilda, research scientist, University of Sydney

„Mangold's program is the first I have seen that can be used to manage data on behavior in a comfortable way. It has the advantage to allow researchers to do all the basic data procedures in a way that can be adapted to the requirements of a great variety of research strategies.“

Dr. phil. Michel Heller, Psychologue and
Psychothérapeute, Switzerland-Lausanne

„There was positive astonishment at the enormous performance range and the flexibility of the program at the training carried out by Mangold Software & Consulting GmbH.“

Uwe Nerger, Lab manager, Human Sciences and
Psychology, University of Osnabrueck

„Thank you so much for the terrific service and support.“

Franziska Hänsenberger-Aebi
Dipl. Speech Therapist, Switzerland-Burgdorf

„After having made a first test run with the new DataView we are all brim over with enthusiasm for it. I've found some of my wishes already realized in that version, too. Thanks! That really saves a lot of time for us“

Dipl.-Ing. Sylvia Hubalek, Center of Ergonomics,
ETH Zürich, Schweiz

„As a powerful software for the analysis of video recordings, INTERACT has provided an enormously valuable help in our research on parent-infant interactions. Due to its open structure and flexibility, INTERACT is very easy to apply to a variety of experimental and clinical purposes. Built-in functions, such as Cohen's Kappa calculations, graphic displays of data and their export to statistical programs facilitates and economizes scientific efforts wherever audiovisual documentation is necessary“

Prof. Dr. Hanuš Papoušek, Professor of Developmental
Psychobiology
